

OK, everyone.

This is a quick-n-dirty on how to use the Magic Wand to delete the blue sky. The video was on the Quick Selection. However, it does not work correctly for this flag because it appears that Photopea has changed the tolerance level.

Choose **Magic Wand**. Then type 1px feather. Then choose the white circles representing **Unite**.

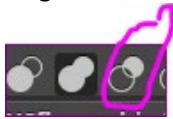

Click once near top left and you'll get this:

Click on bottom right and it will **unite/add** to the selection.

Keep clicking on the blue until all sky is selected. If you accidentally click on the actual flag, choose the

Subtract circles to subtract it out.

Then press delete and you'll get this.
